EDUCATION

2002 - 2005
Computer Science (unfinished)
Lujan University

2017 - Present
Udemy Courses
IT Education

LANGUAGES

English - B2/C1
Spanish - Native

SKILLS

Android with Kotlin
Compose Multiplatform
Jetpack Compose
MVVM, MVI, Clean Arch.
Navigation Components
Flow
Room
Retrofit
Dagger Hilt
Coroutines
JUnit4, Mockito, Espresso
Playstore
App Center
Bitrise
Firebase
React Native
React
NodeJs
Express
Javascript
Typescript

EXPERIENCE

SUGAWAY (ARG)

NOV 2024 - PRESENT - AS A CONSULTANT - ANDROID LEADER

- Create Android project from Zero
- Plan Sprints and Workload for me and my team
- Implement new features required by Product team
- Implement third party SDK to communicate with POS devices
- Work closely with UI/UX team
- Documentation of features
- Code Reviewing
- Bug Solving
- Translate old React Native features to Native Android
- Create test builds and distribute them with AppCenter

-- Kotlin, MVVM, Hilt, Clean Architecture, Jira, Bitbucket, Github, App Center, Jetpack Compose, POS SDK, POS Devices

PAYPAL (USA)

JUN 2024 - PRESENT - AS A CONSULTANT

- Fix Bugs
- Implement new features required by Product team
- Work closely with UI/UX team
- Code Reviewing
- Increment test coverage for new and existing code

-- Kotlin, Junit, Mockito, MVVM, Hilt, Clean Architecture, Jira, Bitbucket, Github, App Center

SYNCHRONY FINANCIAL (USA)

MAY 2023 - FEB 2025

- Fix Bugs
- Implement new features required by Product team
- Work closely with UI/UX team
- Implement Marketplace module with Jetpack Compose
- Train new Android members into Jetpack Compose
- Code Reviewing
- Increment test coverage for new and existing code
- Create test builds and distribute them with AppCenter

-- Kotlin, Jetpack Compose, Junit, Mockito, MVVM, Hilt, Clean Architecture, Jira, Bitbucket, Bitrise, Nexus, App Center

EVENTBRITE (USA)

May 2022 - May 2023

- Fix Bugs
- Implement new features required by Product teams
- Refactor old features into new MVI architecture
- Code Reviewing
- Implement Jetpack compose on new features
- Collect new bugs from Test.io
- Increment test coverage for new and existing code

-- Kotlin, Jetpack Compose, Junit, Mockito, One Signal, Test.io, MVI, MVVM, Hilt, Clean Architecture, Jira, Confluence, Heap, Paparazzi, Google Analytics, Github

TECHINT (LATAM)

May 2021 - May 2022

- Implement new features
- Take architectural decisions as the only Android developer for the project
- Communicate with the client
- Publish in Playstore
- Create test releases and distribute them on App Center
- The app used to load a lot of data at the start, which could take up to 1 minute, causing users to wait a considerable amount of time. I introduced a change in the way data was loaded, reducing the loading time to less than 8 seconds, thus significantly improving the user experience

-- Kotlin, Jetpack Components, MVVM, Hilt, Playstore, Appcenter, Firebase, Jira, Azure devops

TELECOM (LATAM)

Jun 2020 - May 2021

- Create new features in React Native & Native Android
- Translate old features in Ionic to React Native & Native Android
- Create a service application in Kotlin with Ktor
- Help backend team with Node.js, refactoring routes and models with new requirements

-- Kotlin, MVVM, React Native, React Js, Node Js, Express, Firebase, Jira, Svn, Ktor

PUZZLE (ARGENTINA WITH USA CLIENTS)

JAN 2020 - MAR 2021

- Develop applications with React Native (TS)
- Develop webApplications with React.js (TS)
- Help with Backend (NodeJs), creating a service for handling payments
- Communicate with clients
- Make Code Review for peer's PRs
- Coaching to new team members
- Make technical interviews to new candidates

-- Reactjs, React Native, Nextjs, Vercel, Jira, Github, GraphQL, Nodejs, Express
